Project Description

a digital platform that allows customers to purchase flowers and related products online. This application makes it easy for customers to explore and select various types of flowers, add them to the shopping cart, make payments, and arrange delivery to the desired location. Has the following features

- Flower Catalog: presents a complete flower catalog with descriptions, pictures and prices.
- Search and Filter: so customers can search for flowers by keyword
- Shopping Cart: can add the selected flowers to the shopping cart. Product Information: Each flower product will be accompanied by detailed information, such as description, size and shipping options.
- Payment Processing: providing secure payment methods, such as bank transfers, credit cards or electronic payments.
